Project objective

Project Objective

▸ To develop a simple calculator which provides :

Simple arithmetic operation.

The operation performed are

→Addition.

→Subtraction.

→Multiplication.

→ Division.

→Clearing the content of the screen.

What we learnt?

Technical Learning:

▸ HTML

▸ CSS

▸ Javascript

General Learning:

How to design and implement coding Skills.

Introduction

▸ A calculator is a small, portable, often inexpensive electronic device that is used to perform both basic and complex operation of arithmetic.

Software requirements

- HTML

- CSS

- JAVASCRIPT

- VISUAL STUDIO CODE
